CERTIFICATE

No. C25/98

This is to certify that the
FORMALDEHYDE CONTENT

of the particleboards thicknesses up to 25 mm manufactured by

AS Repo Vabrikud

is controlled by VTT Building Technology.

The boards and the manufacturing are controlled according to the German regulations, ETB-Richtlinie, and they are tested according to the standard EN 120.

The perforator values of the boards may not exceed 6,5 mg/100 g as a rolling average value over a period of 1/2 year or 8 mg/100 g as a single value. This fulfills the requirements concerning the German formaldehyde class E1.

The certificate is valid until 31.12.1998. On condition that the quality control has not been cancelled before that date. Inquiries concerning the validity of the contract may be addressed to VTT Building Technology.

Espoo, 20.3.1998
